Amendments to the Claims

- (currently amended) A B. oleracea plant resistant to <u>multiple pathotypes of</u> clubroot disease, wherein the resistance is obtained from a clubroot resistant B. rapa plant and the resistance to clubroot is monogenic and dominant.
- 2. (original) The plant according to claim 1, wherein said *B. oleracea* plant is rated at level 2 or less in a test for the disease having a 1-9 scale or at a level 1 or less in a test for the disease having a 0-5 scale
- 3. (original) The plant according to claim 1, wherein said *B. oleracea* plant is rated at level 1 in a test for the disease having a 1-9 scale or at a level 0 in a test for the disease having a 0-5 scale.
- 4. (original) The plant according to claim 1, wherein said *B. oleracea* plant is broccoli, white cabbage, cauliflower, Brussels sprouts, Borecole, Savoy, or red cabbage.
- (original) The plant according to claim 1, wherein said resistance is linked to a molecular marker obtainable by PCR amplification.
- (original) The plant according to claim 1, wherein said resistance is linked to a molecular marker obtainable by PCR amplification using primer O20 (SEQ ID NO:1) or primer Y13 (SEQ ID NO:2).
- 7. (original) The plant according to claim 5, wherein said resistance is within 10 cM of said molecular marker.
- 8. (original) The plant according to claim 5, wherein said resistance is within 6 cM of said molecular marker.
- 9. (cancelled)

 (original) The plant according to claim 1, wherein said resistance is obtainable from Chinese cabbage F1 hybrid Parkin.

11. (currently amended) A *B. oleracea* plant comprising a locus conferring resistance to <u>multiple</u> <u>pathotypes of</u> clubroot disease, wherein said resistance is obtained from a clubroot resistant *B. rapa* plant and said resistance is monogenic and dominant.

Claims 12-16. (cancelled)

17. (previously presented) The plant according to claim 1, wherein said *B. oleracea* plant is homozygous for said resistance.

18. (previously presented) The plant according to claim 1, wherein said *B. oleracea* plant is heterozygous for said resistance.

19. (previously presented) The plant according to claim 1, wherein said *B. oleracea* plant is an inbred or a dihaploid.

20. (previously presented) The plant according to claim 1, wherein said B. oleracea plant is a hybrid.

21. (previously presented) The plant according to claim 19, wherein said *B. oleracea* plant is cytoplasmic male sterile.

22. (previously presented) A seed of the plant according to claim 1.

23. (previously presented) A fruit or a part of the plant according to claim 1.

24. (previously presented) A part of the plant according to claim 1, wherein said part is pollen, ovule or embryo.

Claims 25-26. (cancelled)

- 27. (withdrawn) A method for producing a *B. oleracea* plant comprising a monogenic and dominant resistance to clubroot comprising the steps of:
 - a) obtaining a B. rapa plant resistant to clubroot:
 - b) crossing said B. rapa plant with a B. oleracea plant,
 - c) rescuing embryos resulting from the cross of step b):
 - d) regenerating a plant from a embryo of step c);
 - e) selecting a plant of step d) that is resistant to clubroot;
 - f) back-crossing a plant resulting from step e) with a B. oleracea plant.
- 28. (withdrawn) The method according to claim 27, further comprising introgressing the resistance into an elite *B. oleracea* inbred.
- 29. (withdrawn) The method according to claim 28, further comprising crossing said inbred to another *B. oleracea* inbred to produce a hybrid.
- 30. (withdrawn) A B. oleracea plant obtainable by the method of claim 27.
- 31. (withdrawn) A method for transferring a monogenic and dominant resistance to clubroot to a
- B. oleracea plant susceptible or less resistant to the disease comprising the steps of:
 - a) obtaining a *B. oleracea* plant comprising a monogenic and dominant resistance to clubroot;
 - b) crossing said *B. oleracea* plant of step a) with a *B. oleracea* plant susceptible or less resistant to clubroot;
 - c) selecting a plant from the cross of step b) that is resistant to clubroot.
- (withdrawn) The method according to claim 31, further comprising backcrossing said resistance into said B. oleracea plant susceptible or less resistant to clubroot.

33. (withdrawn) A DNA fragment amplified from a Brassica genome, wherein said DNA fragment is approximately 400 bp long and comprises SEQ ID NO:1 or wherein said DNA fragment is approximately 640 bp long and comprises SEQ ID NO:2.

34. (cancelled)

35. (withdrawn) The DNA fragment according to claim 33, wherein said DNA fragment is indicative of the presence of a dominant and monogenic resistance to clubroot in a Brassica plant.

Claims 36-40. (cancelled)

- 41. (withdrawn) A kit for detecting a monogenic and dominant resistance to clubroot in a *B. oleracea* plant comprising an oligonucleotide set forth in SEQ ID NO:1 or SEQ ID NO:2.
- 42. (withdrawn) A method for transferring a monogenic and dominant resistance to clubroot to a *B. oleracea* plant susceptible or less resistant to the disease comprising the steps of:
 - a) obtaining a *B. oleracea* plant comprising a monogenic and dominant resistance to clubroot;
 b) crossing said *B. oleracea* plant of step a) with a *B. oleracea* plant susceptible or less resistant to clubroot;
 - c) selecting a plant comprising a DNA fragment obtainable by PCR amplification using primer O20 (SEQ ID NO:1) or primer Y13 (SEQ ID NO:2);

wherein said plant of step c) is resistant to clubroot.

43. (withdrawn) The method according to claim 42, further comprising backcrossing said resistance into said B. oleracea plant susceptible or less resistant to clubroot.

Claims 44-45. (cancelled)

46. (previously presented) A seed of the plant according to claim 11.

- 47. (previously presented) A fruit or a part of the plant according to claim 11.
- (previously presented) The plant according to claim 11, further comprising a nucleic acid sequence, which can be amplified by PCR using primer O20 (SEQ ID NO:1) or primer Y13 (SEQ ID NO:2).
- (previously presented) The plant according to claim 48, wherein a DNA fragment of approximately 400 bp is amplified using primer O20 (SEQ ID NO:1).
- 50. (withdrawn) The plant according to claim 48, wherein a DNA fragment of approximately 640 bp is amplified using primer Y13 (SEQ ID NO:2).
- 51. (previously presented) A seed of the plant according to claim 48.
- 52. (previously presented) A fruit or a part of the plant according to claim 48.
- 53. (currently amended) A B. oleracea plant resistant to <u>multiple pathotypes of</u> clubroot disease, wherein the resistance is obtained from a clubroot resistant B. rapa plant, wherein the clubroot resistant B. rapa plant is a Chinese cabbage F1 hybrid 'Parkin' and the resistance to clubroot is monogenic and dominant.
- 54. (previously presented) A *B. oleracea* plant resistant to clubroot disease wherein the resistance to clubroot is monogenic and dominant and wherein the plant is a plant of line CFL667 deposited with NCIMB under accession number NCIMB 41134, or a progeny or ancestor of said line CFL667 comprising the monogenic and dominant resistance to clubroot comprised in said line CFL667, or a plant derived from said line CFL667 deposited with NCIMB under accession number NCIMB 41134 and comprising the monogenic and dominant resistance to clubroot comprised in said line CFL667.
